PROJECTS

lyricFinder — Github | Demo

March 2019 - April 2019

- ❖ lyricFinder created using React, the Context Api and MusixMatch API.
- ❖ HTTP requests were made using axios.
- ❖ Users can search for their favorite tracks and get a list of tracks that match back.
- ❖ View Lyrics from selected songs as well as other metadata.

Audio Player — Github | Demo

Feb 2019 - March 2019

- ❖ Audio Player created using HTML+CSS+JS+Express+Node
- ❖ Users can click on hotkeys or custom audio controls to play songs, skip to the next song and go back to previous songs.
- ❖ Users can play songs randomly or have them the library loop.

Text-To-Speech — Github | Demo

Feb 2019 - Feb 2019

- ❖ Text-To-Speech was created using the Speech API within Javascript and styled with bootstrap.
- ❖ Users can change the rate,pitch and voice of the API to output the inputted text.

Technical Page — Github | Demo

Dec 2018- Dec 2018 updates March , 2019

- ❖ Technical Page created using HTML+CSS
- ❖ Users can view the Javascript documentation with a side nav to make going to desired sections easier.
